Question 1 (50 marks)

A- Explain what is meant by fixed costs, variable costs, and mixed costs. Provide one example of each type of cost. (10 marks)

B- In your answer sheet, classify each of the following costs as either product costs or period costs. *Also*, indicate whether the cost is fixed or variable with respect to the number of units produced and sold. (10 marks)

No.	*Item*	*Product cost*	*Period cost*	*Fixed Cost*	*Variable Cost*
1	Commissions paid to automobile salespersons				
2	Depreciation of office equipment				
3	Packing car parts for shipping				
4	Indirect raw materials, such as paint and small parts				
5	Insurance on a factory for automobile production				

NOTE: This part must be answered in the answer booklet provided.

C- The following data from the end of last year are taken from the accounting records of Nexus Company for 2024:

Sales		$80,000
Direct labor cost		8,000
Raw material purchases		14,000
Selling expenses		16,000
Administrative expenses		13,500
Manufacturing Overhead		3,500
Inventories	Beginning	Ending
Raw materials	800	1,800
Work in process	1,000	700
Finished goods	2,500	5,000

Required:

1. Prepare a schedule for the cost of goods manufactured.
2. Prepare the income statement. (30 marks)

Question 2 (50 marks)

A- Retro Company gathered the following information for the last six months:

Month	Electricity Cost	Machine Hours
January	$24,400	13,900
February	34,900	22,500
March	27,000	19,800
April	18,400	11,500
May	20,200	14,000
June	13,800	17,500

Required:

Using the high-low method:

1. Calculate the estimated variable portion of electricity costs per machine hour.
2. Calculate the estimated fixed electricity cost each month.
3. If it is estimated that 5,000 machine hours will be run in July, what is the expected total electricity cost for July? (15 marks)

B- Jensen Company sells its only product for $260 per unit. Its total fixed costs are $52,000 per annum and the variable costs are 75% of the unit selling price. The total units produced and sold during the year are 2,000 units.

Required

1. Calculate Jensen's breakeven point in units and dollars. Prove your answer.
2. Calculate the profit earned by the company at the current level of operations (as given)
3. Compute the selling price per unit if BEP (units) is 10,000 units and the fixed costs are $7,000,000 and the variable cost per unit is $600.
4. Calculate the margin of safety in dollars. (35 marks)
