Final Exam

2024-2025 / Fall
Date: 8 Jan. 2025
9:30 – 12:30

Number of Exam Pages: 14 (Including this cover sheet)	**Time Allowed:** **3 hours**

INSTRUCTION

1. Allow approximately 10 minutes to read the instructions on this page and to read through the whole examination paper.

2. There are TWO parts to this examination paper:

Part A (30 marks): There are THREE Questions. You are required to answer TWO questions only; ***if you answer all three questions, only the first two questions will be marked.***

Part B (20 marks): There are TWO Questions. You are required to answer ONE only; ***if you answer both questions, only the first one will be marked.***

3. Carefully follow the instructions in each part.

4. In your answer, make sure that you:

- clearly write the number of the question which you decide to answer.

- cross out any rough notes you make which you do not wish to be marked/graded.

Review your answers carefully paying attention to your grammar, spelling, and punctuation as well as to relevant textual elements (e.g., paragraphing, cohesion & coherence) as part of the mark for each question will be given to language accuracy and text organization

PART A

Answer Two Questions only (30 marks; 15 marks each)

If you answer all three, only the first two will be corrected.

Question 1:

Write the semantic type of each of the main lexical verb in bold as: **V** (for verbal), **M** (for mental), **R** (for relational), **B** (for behavioural) or **Mat** (for material). Then, state if it is ***Finite (F) or Non-Finite (NF)***.

(15 marks: there are 15 processes. Each labelled process = 0.5 mark and correct F/NF label = 0.5)

Scientists have recently discovered (1) a new species of frog in the Amazon rainforest. This species, which had been assumed (2) to be extinct, was last seen (3) more than fifty years ago. Researchers are studying (4) its habitat in an effort to understand (5) how it survived in such a rapidly changing environment. The frog displays (6) unique behaviors that have intrigued (7) biologists. Some conservationists are advocating (8) for the creation of new protected areas to safeguard their habitat. In the past, efforts to preserve (9) endangered species have often been hampered (10) by political and economic challenges. Communities living near the discovery site have expressed (11) their support for conservation initiatives. They believe (12) that preserving the forest is crucial for future generations. Conservation organizations have launched (13) a campaign to raise awareness about the newly found frog. They expect (14) that further research will reveal more about its adaptations. The study is expected to continue (15) over the next decade.

CamScanner

(1) have recently discovered _____

(2) had been assumed _____

(3) was last seen _____

(4) are studying _____

(5) to understand _____

(6) displays _____

(7) have intrigued _____

(8) are advocating _____

(9) to preserve _____

(10) have often been hampered _____

(11) have expressed _____

(12) believe _____

(13) have launched _____

(14) expect _____

(15) is expected to continue _____

Question 2:

Underline the **process** in each given clause below then rewrite the clause to **change its angle of representation** by transforming the process in each clause into a different **verb form/voice** using the verb provided between brackets and do the needed changes.

(15 marks: 0.5 mark for each underlined process and 0.5 for the rewritten clause with the verb between brackets)

For example: I concentrated on the eagles for three hours. (→ held)

Answer: *The eagles held my concentration for three hours.*

1. She described the event in detail. (→ narrate)

2. The artist sketched the portrait in an hour. (→ complete)

3. The committee rejected the proposal after discussion. (→ deny)

4. They enjoyed the concert immensely. (→ entertain)

5. The scientist discovered a new species. (→ reveal)

6. He examined the documents carefully. (→ review)

7. The doctor diagnosed the illness within minutes. (→ identify)

8. She handled the situation with grace. (→ manage)

9. The manager approved the new budget. (→ accept)

CamScanner

10. The students debated the topic vigorously. (→ argue)

_____

_____

11. He formulated a theory about the phenomenon. (→ create)

_____

_____

12. The team developed a new strategy. (→ devise)

_____

_____

13. She investigated the case thoroughly. (→ inquire)

_____

_____

14. The audience applauded the performer enthusiastically. (→ praise)

_____

_____

15. They implemented the changes last month. (→ introduce)

_____

_____

PART B

Answer ONE Question only (20 marks)

If you answer both, only the first one will be corrected.

Question 1:

Write an essay (350 - 400 words) in which you define, explain, and discuss the following related grammatical terms and concepts clearly and fully as they are discussed in the relevant course unit materials. Discuss the similarities and relationship between each two terms in separate body paragraphs. Illustrate your answers with appropriate examples to demonstrate your understanding using your own words.

1. Prescriptive Grammar and Descriptive Grammar ***(5 marks)***
2. Premodifiers and Postmodifiers/Qualifiers ***(5 marks)***
3. Material process and relational process ***(5 marks)***
4. Finite and Non-finite Clauses ***(5 marks)***

Question 2:

Below are two texts of the same length that exemplify the differences in how information is distributed based on textual meta-function of the texts reflecting different modes of communication.

Read the texts carefully and write an essay (350 – 400 words) in which you answer the following questions.

1. How do the texts compare in terms of the lexicogrammatical features of spoken texts? ***(5 marks)***
2. How do the texts compare in terms of the lexicogrammatical features of written texts? ***(5marks)***
3. What other contrasts are there in terms of continuity, foregrounding and voices in the two texts? ***(10 marks)***

Your answer must be full, focused, and well-illustrated. Use your own words.

Text A

In recent years, the global economy has experienced significant fluctuations. Various factors, including political instability, trade wars, and technological advancements, have contributed to these changes. As a result, countries are facing unprecedented challenges in maintaining economic growth. Policymakers are tasked with balancing domestic interests with international cooperation to stabilize markets and promote sustainable development. Without careful planning and coordination, these economic disruptions could lead to long-term global instability.

CamScanner

Text B

So, you know, the economy's been kind of crazy lately. I mean, there's been all this political stuff going on, and then, like, trade wars and new technology too, right? It's just making things super hard for countries to keep growing. I guess, like, governments have to figure out how to keep things stable, while also, you know, working with other countries. If they don't, we're probably going to see even more problems down the line.
