Answer all the questions:

Question 1: Answer the following questions (12 Marks)

1)	Identify the error in this code: **x = [True, False, 3]** **print[x]**	
2)	**y = 2** **listx=[2,1,3]** **for x in listx:** **y = y + x** What is the value of **y?**	
3)	A function cannot be reused in a program. Is this correct about a **function?**	
4)	**num=3** **while num >= 5:** **if num < 8:** **num = num + 1** What is the value of num?	
5)	**def add_numbers(num1, num2):** **sum = num1 + num2** **print("Sum: ", sum)** **add_numbers(5, 8)** What is the output of the above code?	
6)	**num = 2** **while num > 1:** **print (num)** **num =num-1** What is the result of the above code?	
7)	for i in range (0 , 3): print(i**2) **what is the output?**	

AOU EGYPT

8)	How is a **while loop** different from a **for loop?**	
9)	Write an example for an **infinite while loop?**	
10)	**def (a):** **X=0** **X = X + 2** **print(X)** What is the mistake of the above function code?	
11)	**def cube(x,y):** **if x > y:** **print(x*x*x)** **else:** **print(y*y*y)** **r = cube(3,2)** What is the result of the above?	
12)	**x = ['True',3,True,1]** **for i in x :** **print(i)** What is the result of the above code?	

Question 2: Find the output of the below code (8 Marks: 4 each)

A.	**for x in range (1,10,3):** **print (x * 3)**	Put your answer here:
B.	**num = 3** **while num >0:** **print(num*3)** **num = num – 1**	Put your answer here:

FOU EGYPT

Question 3: Write the code as requested (30 Marks: 10 each)

A.	Write a code using **a while loop** to print the numbers from 1 to 3, and prints its cube next to it as follows Output: 1 1 2 8 3 27	Put your code here:
B.	Write a code using **for loop** that computes the sum of 6 elements in a given list a=[2,8,3,5,5,10] and prints the sum of elements	Put your code here:
C.	Write a code for a function named **sign**. It takes a number and does as follows: • If the number is negative, prints **It's negative** • If the number is positive, prints **It's positive**	Put your code here:
