Security, Ethics and Privacy in IT and Computing

Final Examination
Fall Semester 2025/2026

Date: 21/Jan./2026

Number of Exam Pages: 4 (including this cover sheet)	**Time Allowed:** 2 hours

Instructions:

- This Final Exam has two parts that are worth 50 marks.
- All parts are mandatory.
- ALL answers must be written in the answer booklet.
- Write your name and ID on the answer booklet cover page.
- The use of any electronic device is NOT permitted.

Part 1: Choose the correct answer (Write your answer in the Answer Booklet) [20 marks]

1. Most commentators cite the benefits of privacy as a reason why people ought to have some privacy rights. A right that benefits society is called a
   a) Constitutional right.
   b) legal right.
   c) natural right.
   d) prudential right.
2. A public record contains information about an incident or action reported to a government agency for the purpose of
   a) enhancing public safety.
   b) informing the public.
   c) protecting the innocent.
   d) regulating the economy.
3. An example of a public record is
   a) a birth certificate.
   b) a marriage license.
   c) a record of a criminal conviction.
   d) All of the above
4. What benefit does a company gain by allowing people to login to its app using Facebook Login?
   a) It gains access to information from the consumers' Facebook profiles.
   b) It is paid a royalty from Facebook.
   c) It suffers less credit card fraud.
   d) All of the above
5. The process of searching through many records in one or more databases looking for patterns or relationships is called
   a) credit reporting.
   b) data mining.
   c) information gathering.
   d) microtargeting.
6. When information collected for one purpose is put to another purpose, that is called a
   a) backdoor exploit.
   b) cookie.
   c) data leveraging opportunity.
   d) secondary use of the data.
7. A policy that requires the consumer to explicitly give permission before an organization can share information with another organization is called
   a) fair use.
   b) full disclosure.
   c) opt-in.
   d) opt-out.
8. The practice of mailing advertisements only to the most likely prospects is called
   a) focused mailing.
   b) mail list trimming..
   c) predatory mailing.
   d) targeted direct mail.
9. A piece of self-replicating code embedded within another program is called a
   a) hack.
   b) Trojan horse.
   c) virus.
   d) worm.
10. A self-contained program that spreads through a computer network by exploiting security holes is called a
    a) hack.
    b) rogue.
    c) virus.
    d) worm.
11. A program with a benign capability that conceals another, sinister purpose is called a
    a) hack.
    b) rogue.
    c) Trojan horse.
    d) virus.
12. You may find a virus
    a) on a hard disk.
    b) on a CD-ROM.
    c) in an email attachment.
    d) All of the above

13. The Conficker worm is notable because
    a) it is Cuba's first attempt at cyberwarfare.
    b) it is the fastest spreading worm of all time.
    c) it shut down the White House Web site for three days.
    d) it continues to infect computers many years after it was first discovered.
14. A software program that responds to commands sent by a command-and-control program located on an external computer is called a
    a) bot.
    b) spoof.
    c) vampire.
    d) virus.
15. An intentional action designed to prevent legitimate users from making use of a computer service over the Internet is called
    a) a bombing run.
    b) a denial-of-service attack.
    c) an electronic overdose.
    d) phreaking.
16. Which of the following statements about the fatal Tesla accident involving Joshua Brown is not true?
    a) The "autopilot" feature was engaged.
    b) The Tesla was speeding.
    c) Foggy conditions made visibility poor.
    d) Autopilot's radar mistook the tractor trailer for an overhead sign.
17. Computer simulations can
    a) accurately predict the weather a month in advance.
    b) save automobile manufacturers time and money as they develop new cars.
    c) prove our planet is overpopulated.
    d) All of the above
18. The process of determining if a model is an accurate representation of the real system is called
    a) the null hypothesis.
    b) software engineering.
    c) validation.
    d) verification.
19. The discipline focused on the production of software, as well as the development of tools, methodologies, and theories supporting software production, is most accurately called
    a) artificial intelligence.
    b) computer engineering.
    c) computer science.
    d) software engineering.
20. In which situations are simulations considered better than physical experiments, and what are their main applications?
    a) When experiments are too expensive, unethical, or impossible; applications include modeling past events, understanding the world, and predicting the future
    b) When experiments are simple, low-cost, and repeatable; applications include recording data and storing results only
    c) When experiments are fast, fun, and entertaining; applications include gaming and media only
    d) When experiments require no data collection; applications include avoiding real-world testing entirely

Part 2: Answer the following questions: [30 marks]

Question 1: [10 marks]
Define the following terms.

1. Cookie
2. Data brokers
3. Sidejacking

CamScanner

4. Ransomware
5. Verification

Question 2: [10 marks]

A. Explain the benefits of privacy in an individual's life. (5 marks)

B. Discuss the concept of collaborative filtering as a form of data mining. (5 marks)

Question 3: [10 marks]

A. Explain the difference between general phishing and spear-phishing, highlighting how targeted attacks are carried out and why they are considered more dangerous. (5 marks)

B. Discuss why simulations are often considered better than physical experiments in certain situations. Also, describe the main applications of simulations. (5 marks)
