QUESTION ONE (25 MARKS)

- *You should attempt to answer **ALL** questions in this section.*

Case Study:

FreshBakes is a local bakery that supplies bread and cakes to several supermarkets. However, the supermarkets usually pay their invoices only after 60 to 90 days. This long wait created cash flow problems, making it difficult for FreshBakes to pay for flour, sugar, and staff wages on time. To overcome this, FreshBakes turned to **debt factoring**. By selling its unpaid invoices to a factoring company, FreshBakes received most of the payment immediately, while the factoring company later collected the full amount from the supermarkets.

Q1 a. (15 Marks).

Discuss debt factoring as a form of raising finance for small and medium-sized enterprises (SMEs). In your answer, explain how debt factoring works and how it can help businesses manage their cash flow needs.
