Final Examination
Spring Semester 2025/2026

Date: 15/06/2026

Number of Exam Pages: 04 (including this cover sheet)	**Time Allowed: 3 Hrs**

Instructions:

- Total Marks: **100**
- This exam consists of **03** parts.
- **ALL questions** must be answered in the External Answer booklet.
- Be sure you write your **name and ID** on the External Answer booklet.
- **Calculators** are **not** allowed.

AOU EGYPT

PART 1 (20 Marks)

Choose the rightest option

1. Which function is used in PHP form validation to remove whitespace from the beginning and end of input data?
   A) strip_tags()
   B) stripslashes()
   C) trim()
   D) htmlspecialchars()
2. In a relational database, which attribute uniquely identifies each row in a table?
   A) Foreign Key
   B) Alternate Key
   C) Primary Key
   D) Composite Key
3. Which SQL command is used to create a new database?
   A) MAKE DATABASE
   B) NEW DATABASE
   C) CREATE DATABASE
   D) ADD DATABASE
4. Which superglobal array embed the form data to destination URL after submitting the HTML form?
   A) $_GET
   B) $_POST
   C) $_REQUEST
   D) All of the above
5. Which MySQLi function is used to execute an SQL query in object-oriented style?
   A) execute()
   B) run()
   C) query()
   D) fetch()
6. What is the main advantage of using prepared statements in PHP with MySQL?
   A) Makes queries slower
   B) Reduces table size
   C) Protects against SQL injection
   D) Automatically creates tables
7. A foreign key is used to:
   A) Uniquely identify a row in the same table
   B) Create a relationship between two tables
   C) Store duplicate values
   D) Replace primary key
8. Which component is primarily used as a container to layout other components in React Native?
   A) <Text>
   B) <Image>
   C) <View>
   D) <Container>
9. Which component is used in React Native to display text on the screen?
   A) <View>
   B) <Text>
   C) <Div>
   D) <Label>
10. 10. What is the main advantage of using prepared statements in PHP with MySQL?
    A) Makes queries slower
    B) Reduces table size
    C) Protects against SQL injection
    D) Automatically creates tables

YOUEGYPT

PART 2 (30 Marks)

Answer the following question.

1. Consider the following table structure for a Student Enrollment database:

StudentEnrollments (StudentID, CourseID, StudentName, CourseName, InstructorID, InstructorName) Primary Key: (StudentID, CourseID)

   To which normal form this table confirms and how can it be resolved to satisfy the next higher normal form? Show the tables in the next higher normal form. [10 marks]

2. What is the output of the following PHP code, and explain the role of the global keyword in this context? [5 marks]

```
$visits = 0;
function trackVisits() {
    global $visits;
    $visits++;
    echo "Visit number: " . $visits . "\n";
}
trackVisits();
trackVisits();
trackVisits();
trackVisits();
```

3. The most used React-Native core components are <View>, <Text>, <Image>, <TextInput>. Describe these components. [6 marks]

4. Discuss the process of using MySQL with PHP. [9 Marks]

PART 3 (50 Marks)

Answer the following questions

Question 1:

Figure-1 is an event registration form having 5 fields. Provide proper code to insert data of the event registration form to “events” table in “evm_db” database through “event_registration.php” server file.

The method used to post the data of this form is “POST”.

Your answer must include the following

1. Create a table called “Events” using SQL that must have the form fields to store the data. [8 marks]
2. Code “event_registration.php” that accepts the data and insert data into the events table. This must include
   a. Database configuration parameters such as [2 marks]
      i. Server Name: “localhost”, User Name: “EVM”, Password: “pass_evm”, Db Name: “evm_db”
   b. Create connection [3 marks]
   c. Check connection [4 marks]
   d. Prepare SQL statement and bind data [6 marks]
   e. Set parameters and execute [9 marks]
   f. Close statement and connection [2 marks]
