8- Any form of cheating will **NOT** be tolerated and will subject you to AOU Cheating Policy.

YOU HAVE TO ANSWER ALL THE QUESTIONS

Question one: (25 marks)

A bank manages extremely sensitive customer data and financial data, and faces risks such as unauthorized access, data breaches, system failures, and regulatory scrutiny. **Explain FIVE control techniques the bank can use to protect its information systems and data. Support your answer with examples.**

Question two: (25 marks)

A medium-sized bank relies heavily on IT systems for online banking, customer records, and regulatory reporting. While some IT procedures exist, they are applied inconsistently across departments, and many decisions still depend on individual staff experience rather than formal policies. Senior management wants to assess how mature its IT governance practices are and identify areas for improvement. **Using the COBIT (Control Objectives for Information and Related Technology) maturity model, explain FOUR the maturity levels and identify the best level which describes the bank's current IT governance practices. Support your answer with examples.**

Question three: (25 marks)

A retail bank faces digital competition, regulatory changes, and increasing customer demand for online services. **Explain how business strategy and IS/IT strategies must be closely aligned to ensure that technology effectively supports organizational goals and identify the key factors that influence each strategy. Support your answer with examples.**

Question four: (25 marks)

A regional bank is replacing its legacy core banking system. Management must select an implementation approach that balances risk, cost, and continuity of operations. **Explain the advantages and disadvantages of the four system changeover methods that could be used to implement the new system. Support your answer with examples.**
