Section I: Translation (15 marks: 60 minutes)

Question 1: Technical Translation (10 marks: 30 minutes)

Translate the user guide below for Apple TV singing onscreen with visual effects into Modern Standard Arabic. Your Arabic translation should adhere to the linguistic and cultural conventions of the Arabic target reader.

When you have a Continuity Camera set up, you can see yourself singing onscreen along with lyrics. For more fun, you can add visual effects to your image and lyrics to enhance the sing-along experience.

1. Do either of the following:
   - Select the Apple Music Sing icon  on the Apple TV Home Screen.
   - Go to the Music app  on Apple TV, then navigate to Sing at the top of the screen.
2. Start playing a song, or navigate to Now Playing at the top of the screen.
3. Show playback controls, swipe down on the clickpad or touch surface, then select  .
4. Swipe up on the clickpad or touch surface, select  , choose Sing with Camera, then select Connect iPhone or iPad.

Note: If onscreen effects aren't available for the current song, or if you haven't set up Continuity Camera, the Sing with Camera option is dimmed.

Question 1: Translation Revision (10 marks: 15 minutes)

Edit and proofread the Arabic translation below of an English scientific text. You need to identify and correct FIVE errors ONLY.

English ST	Arabic TT
Chronic kidney disease (CKD) is more prevalent in the elderly population. Almost half of the patients with CKD are older than 70 years. However, while younger patients with CKD typically experience progressive loss of kidney function, 30% of patients over 65 years of age with CKD have stable disease. CKD is associated with an increased risk of cardiovascular disease and end-stage kidney disease (ESKD). Kidney disease is the 9th leading cause of death in the United States.	يُعتبر مرض الكلى المزمن أكثر إنتشارًا بين كبار السن. ما يقرب من نصف مرضى الكلى المزمن هم فوق سن 70 عام. ومع ذلك، بينما يعاني المرضى الأصغر سنًا المصابين بمرض الكلى المزمن عادةً من فقدان تدريجي لوظائف الكلى، فإن 30% من المرضى الذين زادت أعمارهم عن 65 عامًا والمصابين بمرض الكلى المزمن لديهم حالة مستقرة. وترتبط المرض بزيادة خطر الإصابة بأمراض القلوب والأوعية الدموية ومرض الكلى في مرحلته النهائية (ESKD). ويُعدّ مرض الكلى تاسع سبب رئيسية للوفاة في الولايات المتحدة.
